

# Come On Snob

Lou Bond

Come on snob

Please get your nose out of the air  
Don't you know it's polluted up there  
Hey, won't you come on down  
And join the people that care  
About making this world  
Just and fair

Please get your nose out of the air  
Don't you know it's polluted up there  
Hey, won't you come on down  
And join the people that care  
About making this world  
Just and fair

Is it your looks now  
On which you base your stand  
That makes you think  
You're the leader of the band  
You don't look any better  
I'm just different that's all

Vive la difference, as they say in France  
Well if it makes you act so small  
Even under the skin now y'all

They say we're all supposed to be just about the same I can believe it  
And if you think that you can loose something ---  
That nobody else can

I'm here to tell you that you built your castle on a grain of sand  
Because you're not a damn bit better  
Than nobody else in the land

Please please please please please please please please please please please  
Please please please please please please please please please please please please

Please get your nose out of the air snob  
Don't you know it's polluted up there  
Hey, won't you come on down now  
And join the people that care  
About making this world  
Just and fair

Is it your looks now  
Tell me that  
On which you base your stand

That makes you think  
You're the leader of the band  
I'm here to tell you that you built your castle on a grain of sand  
Please please please please please please please please please please  
Please please please please please please please please please please please  
Please please please please please please please please please please please please  
Please please please please please please please please please please please please
