I Still Love You

Dables

Oh oh yeah yeah yeah
Oh oh yeah yeah
See everybody needs someone by their side
And I can't go on without you another night
Since companionships been gone
My life has been so slow without you, you
See it don't take a rocket scientist to know I love you
And it don't take a rocket scientist to know I need you
See if you believe that you and me can change the world someday
Then you believe me when I say
I still love you, I still love you
I decided I still love you
I still love you, I decided
So what do you think, let's get back together
There's nothin' it could hurt, it could only get better
Think of what it last felt like
You and I to turn our nights into forever
See, see it don't take a rocket scientist to know I love you
And it don't take a rocket scientist to know I need you
See if you believe that you and me can change the world someday

Then you believe me when I say
I still love you, I still love you
I decided I still love you
I still love you, I still love you, I still love you
I decided I still love you
I still love you, I decided
Never dreamed I'd be so happy and sure of myself
Baby life without you is so dark
Now I know it'll never be me lovin' someone else
This precious love, you're my shinin' star
I remember when we first fell in love
I was too young to know what it was
I couldn't address what made me know
But quick to tell you how it felt that love was so real and it still is
I still love you, I still love you
I decided I still love you
I still love you, I still love you, I still love you
I decided I still love you

I still love you, I decided
