

In Quest For

Avantasia

Coming from the wastelands
Full of reason, common sense
Where their principles are blocking minds
And you don't understand Giving you belief
You never touch, you never see
But if you dare to try to grip it
You're accused for heresy Here I stand to find the truth
And for ought I know
You're the one to show me
You can tell my spirit how to grow No, the more I try
The more confusion on my mind
And no matter how I try
I feel my eyes seem to stay blind No use in analyzing
Forget about alchemy
Because the secret of all truth
Is the quest for and you'll feel Oh, when you knock right on the door
"Forever locked", they say
A little man will let you in
For you have always tried to get inside You're in quest for more to find the core
Your journey still ain't over
Your quest is your purpose, go on You're in quest for more to find the core
It will be never over
Your quest is your purpose, go on Yeah, you're in quest for more to find the core
Your journey still ain't over
Your quest is your purpose, go on You're in quest for more to find the core
It will be never over
Your quest is your purpose, go on You're in quest for more to find the core
Your journey still ain't over
Your quest is your purpose, go on You're in quest for more to find the core
It will be never over
Your quest is your purpose, go on, yeah
