All Is Not Lost

Ok Go

It's coming down, babe
Could be as bad as they talked about
It's coming down, babe
Could be before we can make it out
But when they say that all is lost
All is not lost, all is not lost
But when they say that all is lost
All is not lost, no, all is not lost at all
They could be right about it
They could be right in some crazy way
'Cause if they yell fire, well, that's what we get
Yeah, they yell fire and that's what we get
So, yeah, it's coming babe
Probably bad as they talked about
But just remember when the tide rolls in
It can't be too long until it rolls back out
And when they say that all is lost
All is not lost, all is not lost
And when they say that all is lost
All is not lost, no, all is not lost at all
And if they burn
If they burn this place down to the ground
What does it matter?
What does it matter?
'Cause when they say that all is lost
All is not lost, all is not lost
But when they say that all is lost
All is not lost, no, all is not lost, not lost at all
No, all is not lost at all
No, all is not lost, not lost at all
