Over the Moon

The Hues

When you left, I met a girl who turns the world upside down
Counting satellites, we let the twilights swim inside
I can almost reach the clouds
But I cant lift my feet off the ground

And I should be, over the moon
Spinning in the sky
Floating to mars, why dont I feel like im
Holding the stars when shes lying in my arms
I should be, over the moon
But I still aint over you

You took me high
You held my hand
Taught me to dance
On the skyline
Like wild stallions
We rolling free
Shes showing me
New horizons

And I can almost see the sun
And I can lift my feet and run

I should be, over the moon
Spinning in the sky
Floating to mars
Why dont I feel like im holding the stars
When shes lying in my arms
I should be
Over the moon
And I still aint over you

I thought her kiss would carry me across the deep ocean blue
But loving her aint like loving you

You send me over the moon
Spinning in the sky
Floating to mars
You make me feel like im

Holding the stars when youre lying in my arms
I should be
Over the moon
Spinning in the sky
Floating to mars
I hope I feel like im
Holding the stars
I want you back in my arms
I should be
Over the moon

I still aint over you
I still aint over you
