

Never Born

Yoop

Love is like a shelter
Brings me through the storm
Life is full of anger Maybe I'm dead again now
Maybe there's life in me
So much stronger than the world give it to me Here's the deal, leave it or not
What a surprise, your baby's unborn Nothin' else is deeper
Nothin' else is good
No one cares about the blood in you I see you through that all
I feel you through the wall
And I save my child and I save I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, leave me alone now I don't feel the darkness
Don't feel anything
Pressure's lost and pressure's good with you Don't move, don't hide secrets
Play hard, play it alone
Move the soul without your own control I see you through that all
I feel you through the wall
And I save my child and I save I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, leave me away, away, away, away
Aah, never let me down What'cha sayin', what'cha sayin', what'cha sayin'
So watch again, watch again, watch again
So why you're here, why you're here, why you're here, why you're here
No one cares, no one, no one, no one, no one cares
No one, no one, no one, no one cares
No one, no one, no one, no one, no one, no one, no one really cares I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, never let me down again

I in me and you are here now
Hold it, save it, never let me down again
I in me and you are here now
Hold it, save it, leave me away, away, away, away
What'cha sayin', what'cha sayin', what'cha sayin'
What'cha sayin', what'cha sayin', what'cha sayin'
