

You Got Love

[Tim Chaisson](#)

There's days ahead, miles to come
You're never alone, there's always someone
That has your back, that sees you through
Shows you all that you can do

Your pain was never spoken
You can heal a heart that's open

You got love,
Anytime the sky is grey
You can hold on another day
You got love
That forever keeps you strong
Is always right, never wrong
You got love

There's something about you that always shows
Your nervous mind your heart of gold
Dig a bit deeper, into your soul
You got so many riches than you'll never know
