

Reality

Monica da Silva

I see black you see white
I want darkness you want light
I want time you want space
I go slow you want to race
Do you think we might agree
In this lifetime hopefully
Or do you think we stand a chance

You live in one reality and I live in another
And I could wade through fantasy but I don't need the trouble
No matter how we disagree I know you'll come around
You're never gonna live this down

I'm never gonna let you down
Never gonna let you down
Never gonna let you down in the end
I'm never gonna let you down
Never gonna let you down
Never gonna let you down in the end

I say wrong you say right
I want day well you want night
I want time you want space
I keep up you set the pace
Do you think we might agree
In this lifetime hopefully
Or do you think we stand a chance

You live in one reality and I live in another
And I could wade through fantasy but I don't need the trouble
No matter how we disagree I know you'll come around
You're never gonna live this down

I'm never gonna let you down
Never gonna let you down
Never gonna let you down in the end
I'm never gonna let you down
Never gonna let you down
Never gonna let you down in the end

Translucent
Life is lucid
You can see right through me now
Oh won't somebody save me
Or bring me back somehow

I'm never gonna let you down
Never gonna let you down
Never gonna let you down in the end
I'm never gonna let you down
Never gonna let you down
Never gonna let you down in the end

I'm never gonna let you down
Never gonna let you down
Never gonna let you down in the end
I'm never gonna let you down
Never gonna let you down
Never gonna let you down
Let you down again
