

# Escape

## Kongos

Every few thousand years  
Come true man's greatest fears  
All the living things  
Mother nature brings to tearsWhen the bombs are bursting in the air  
And the rockets are making that red glare  
I'm heading down  
Down to that good hope town, where the weather's fairSo why don't you come away  
With me my love  
We'll do what it takes  
I'll keep you safeWhy don't you stay by me  
And when the time comes  
We'll escapeWhen the big one finally hit's LA  
When Yellowstone has it's day  
We're heading to the southern tip  
On a plane or on a ship  
We'll do what it takes, we'll find a wayAnd if that cloud forms up above  
No sign anywhere of a dove  
There'll be no reason left to stay  
We'll try and live another day  
In a place where there's still loveSo why don't you come away  
With me my love  
We'll do what it takes  
I'll keep you safeWhy don't you stay by me  
And when the time comes  
We'll escapeOh, come away with me  
We'll escapeOh, come away with me  
We'll escapeSo why don't you come away  
With me my love  
We'll do what it takes  
I'll keep you safeWhy don't you stay by me  
And when the time comes  
We'll escape  
We'll escape
