

# It Isn't Just Me

## Goldfinger

It isn't just me  
That wants to be here by your side  
And I know it isn't just me  
That wants to be next to your side  
And I know  
I only want to hold you  
Is that asking way too much  
I only want to feel you  
You're so far away  
I guess I'll believe that you care  
And I think the things that you said  
Keep running around in my head  
And I know I only want to trust you  
You lied to me before  
I don't know if I can trust you  
In time I'll know for sure  
It's only been three days  
Since I have seen your face  
I don't think I can wait three more  
I know that I can't wait  
The static on the phone  
Makes you so far away  
I watch the clock tick by  
You haven't called today  
And then I fall apart  
Waiting for your call  
You don't tell me how you feel  
You leave me in the dark  
I guess I blame myself  
For staying here with you  
I just want to hear the words  
You say you need me too
