

Role Play

Ginuwine

Let's play a little game, a forte
Here's a little fantasy and role play
No lips ever the same, so let's play
A little fantasy and role play First take, come right in and take off your skirt
Sit right down and let 'G' go to work
'Cause, being my patient has its perks
Come and show the doctor exactly where it hurts You say the pain, it hurts right there
So come and lay it down, yeah, right over here
You see with me, the fun will never end
Playin' my little game of role play pretend Let's play a little game, a forte
Here's a little fantasy and role play
No lips ever the same, so let's play
A little fantasy and role play Take two, come right in with the handcuffs on
I planned a lot of kinky stuff to the break of dawn, yeah
We're gonna do it nice and rough 'til your fears are gone
I'm a be the one to flip it up and rub it down and that's my wore, it's bond 'Cause I'm your master and you're
my slave
Everything I say you will obey
You see with me, the fun will never end
Playin' my little game of role play pretend Let's play a little game, a forte
Here's a little fantasy and role play
No lips ever the same, so let's play
A little fantasy and role play Now I can be your cowboy, ride in my rodeo
I can be your dancer, baby, see my exotic show
I can be your teacher and you can be my pet
Or I can be you director, baby, get naked on the movie set Whatever your fantasy, whatever your dream
Just set the stage, girl and let's start the scene
Tonight's the night, I'm gonna give into you, yeah
The way you wish those other guys would do Let's play a little game, a forte
Here's a little fantasy and role play
No lips ever the same, so let's play
A little fantasy and role play Let's play a little game, a forte
Here's a little fantasy and role play
No lips ever the same, so let's play
A little fantasy and role play Let's play a little game
Fantasy and role play
