Colder

The Swon Brothers

I probably could have turned and found
A way to make you stop and say this
Sometimes the truth will burn
Your pride will hurt if you're the one who's waitingI guess it's time to say the words, "It's over"
And time to leave these ruins as they smolderI should have walked away
When I saw you looking over your shoulder
I knew it right away
When you looked at me that way it was colder
Yeah, you were colderYou had me by the hand
And shook me hard and let me stand alone
Redrew every line and took your time
And mapped out how you'd go aloneI guess it's time to say the words, "It's over"
It's time to leave these ruins as they smolderI should have walked away
When I saw you looking over your shoulder
I knew it right away
When you looked at me that way it was colder
Yeah, it was colderHow'd you even kiss my lips
When you wanted goodbye?
And how'd you just stand right there
Look through the lies?I guess it's time to say the words, "It's over"
And time to leave these ruins as they smolderI should have walked away
When I saw you looking over your shoulder
I knew it right away
When you looked at me that way it was colder
Yeah, it was colder
I guess it's overWish I had found a way to make you stop and stay
But it's over
