

All This Time (Modestep Remix) (preview)

[Ryan Keen](#)

I caught you running through my head again
Trespassing in my mind
and stealing all my thoughts away
you do it all the time now
thought i built my walls high
you still broke them down
I will lock the gates again.
But they cant keep you outAll this time
I never knew love was blind
the devil in you unkind
coz you were always on my mind.
I lost myself in the past again
I tried to bring it back
but second time was just not the same
the foundations still had cracks
though we tried to build a bridge
The gap was just too far
and i watched it all fall down.
Now i dont know where you are.With every passing day
I feel the distance in my heart
and every silent hour is just pushing us apart.
with every thats done
and with all all that been said
i still hear a distant sound
its your voice inside my head saying
All this time
I never knew love was blind
the devil in you unkind
coz you were always on my mind.All this time
I never knew love was blind
