

Death Certificate

Diezel Xzaust

A grim myriad, a gray kaleidoscope

Sterile, constricting

Born and die, institutionalized

A bleak epitaph, an analogue so sadCross indexed, cross dissected

Cross referenced, contabescenceCross indexed, cross bisected

Cross referenced, certificate of deathMachine coded, reduced to hard memory

In a data base

Digitalized, statistical obituary

You only legacy, your final resting placeCross indexed, cross dissected

Cross referenced, contabescenceCross indexed, cross bisected

Cross referenced, certified deadCross indexed, cross dissected

Cross referenced, contabescenceCross indexed, cross bisected

Cross referenced, certificate of death
