Signals

Information Society

I'm the signal that she sends
How can we be friends?
This life with her
It just never endsShe whispers in my ear
Sings my deepest fears
This love affair's been growing for yearsYou and I
Sang that song
We were against them all
Where did we go wrong?She sings about the night
She says it's all alright
She never shows herself in the lightShe's innocent and free
The Genius of the sea
She's all the World
If we could just seeYou and I
Sang that song
We were against them all
Where did we go wrong?You and I
Sang that song
We were against them all
Where did we go wrong?I'm the signal that she sends
How can we be friends?
This life with her
It just never endsShe whispers in my ear
Sings my deepest fears
This love affair's been growing for yearsYou and I
Sang that song
We were against them all
Where did we go wrong?
