

Strange Behaviour

Karnataka

Here it comes
Can you feel it
Can you see it How do you feel about this
And would you please explain
Sure of the future aren't you
I hope you're right
It may be a kind of madness
But we're captured by it all
A part of this strange behaviour
Wanting it more I think we've made it
The walls coming down this time
There must be a reason This must be what we've dreamed of
This never ending ride
Parallel lives we're living
With time on our side Turn the lights down and here we go again
Head up, watch where you're walking
It might not make a difference tonight
But then again, okay, take all you can We're out of space and out of time
We feel so high, but still so alone
The years move on we're the same inside
Oh nothing has changed There was a different lifetime
Where no-one knew your name
Now everyone wants to touch you
Wanting it more Turn the lights down and here we go again
Head up, watch where you're walking
It might not make a difference tonight
But then again, okay, take all you can We're out of space and out of time
We feel so high, but still so alone
The years move on we're the same inside
Oh nothing, no nothing has changed Here it comes
Did you feel it
Did you see it
