Drop Down

Designer Drugs

Synthetic, pathetic the words you tell me
You try to trick me
Hypnotic, demonic and always schemin'
Won't let me be
Erratic, fanatic, you move too quickly
You can't confuse me
Heretic, genetic, a new condition
Your twisted mind drops down
What you think?
Think you know me
What you think?
You don't know me
Never want to do nothing but bring me down
You just bring me down, you bring out my hatred
Never want to do nothing but bring me down
You just bring me down, you bring out my hatred
The logic, methodic, you're never changing
That's how you think
Sadistic, statistic, what's the matter
Don't you like the pain?
Frantic, you panic, there's no escapin'
'Cause you ran too late
Realistic, horrific, you can't stop me
You see me comin' drop down
What you think?
Think you know me
What you think?
You don't know me
Never want to do nothing but bring me down
You just bring me down, you bring out my hatred
Never want to do nothing but bring me down
You just bring me down, you bring out my hatred
Can't justify the pain you put me through
Can't justify the pain you put me through
Can't justify the pain you put me through
Can't justify the pain
You make me bleed from the back stabbing
You make me hate with your attitude
Lied from the start

You told me everything but the truth
Never want to do nothing but bring me down
You just bring me down, you bring out my hatred
Never want to do noting but bring me down
You just bring me down, you bring out my hatred
Bleed from the back stabbing
Makes me hate with your attitude
Lied from the start
You told me everything but the truth
Bleed from the back stabbing
Makes me hate with your attitude
Lied from the start
You told me everything but the truth
