

Make It Up

Bodyjar

Taken all my chances There are no excuses There is no use talking about You go through life you make it up
Wondering if your still around Its all your mind just make it up You know what's waiting for you You know
what's waiting You're strong enough to know the truth about it anyway And I won't wait this time Taken all my
chances There are no excuses Wondering wont help me decide There is no point feeling denied You go through
life you make it up You know what's waiting You know what's waiting for you Its all your mind just make it up
You're strong enough to know the truth about it anyway And I won't wait this time This time (x2) You go
through life you make it up You go through life you make it up You know what's waiting for you You know
what's waiting (x2)
