

City of Night

Perseids

Well the sun's going down
With its deep amber light
Embracing the town as we fall into night
To the silvery sound as the birds fly away
 Getting ready for love
 Getting out of the day
 It is the city of night
 It is the city if night
Leave the worries of day behind
And dream a new dream tonight

All the lands are a glow
All the lids painted red
And you wish you could take
 That last thing you said
 Well the night is a drum
 Singing songs of delight
But when dawn comes along
 Love is lost in the light
 But in the city of night
 Oh, in the city of night
Leave the troubles of day behind
And dream a new dream tonight
