

The Woodland National Anthem

Arcade Fire

I guess well have to move
The neighborhood is on to us Lets join the little babes
Throwin rocks in front of us Riding on my bicycle
I pass my sister on a bus
Lets take the country road before our parents send for us Trees keep fallin at my feet
I guess its time ot build a boat
Make a raft of our bodies
Do you think that itll float? What I said was not a joke
But you just licked the envelope
Im tired of dating, lets elope
But you just licked the envelope Three cheers for my parents
Lonely failed experiments
Three cheers for my parents
Lonely failed experiments Dont you dare blame my parents
Im the only failed experiment
Dont you dare blame your parents
Youre the only failed experiment Dont you dare blame your grandparents
Moms the only failed experiment
Dont you dare blame your grandparents
Dads the only failed experiment Dont blame God
Just blame God
Dont blame God
