One Night

Lake Stovall

I saw you and I knew that I should say something
Only one night with you babe
Maybe this can really mean something

You were with your girls, high heals you're the leader
Walkin' in front babygirl I had to meet ya
Sexy down to a T, damn
That's when I crossed the street
And as I approached you, your girls knew that I was on my way
And I can tell you were curious of what I was gonna say
So I made sure my words were directed
Made sure your eyes were connect with mine
For the night

When I saw you, I knew that I should say something
Only one night with you
Maybe this can really mean something

What's your name? Wait, don't answer that
Unless you want to
And I can answer back
Can we start over
Hello, how do you do
Your beautiful but I'm sure you know that's not what I'm here to say
You know exactly what you're doing
In this game I want to play
So babe, grab my hand we can get away
Bring your friends and they can all meet mine
For the night

When I saw you, I knew that I should say something
Only one night with you
Maybe this can really mean something

Repeat 2x
Only one night with you (be my get away x3)
Only one night with you (be my get away x3)

When I saw you, I knew that I should say something
Only one night with you

Maybe this can really mean something

When I saw you, I knew that I should say something
Only one night with you
Maybe this can really mean something

When I saw you...
