Kill Caustic

Afi

So, I'm feeling much worse now
You're better, you're better
Your designer drugs
Won't work, won't work for me
Connect to a three-volt
I hope your battery dies
How could you run
On such, such voltage?
All the same, I remain
The one you blame and I'm
Demonized, purified, justified
As you let yourself show
So now you'll love these screams
What's left of me
Don't speak
Love these screams
Like I do
My name
As the infinite stops cold
Just nine and the six are gone
Guess I was the one to ride, ride
Ride that dirty ride
That is turning so fast now
I think I cannot, cannot hold on
But at this pace
Who'd want, who'd want to
All the same I remain
The one you blame and I'm
Demonized, purified, justified
As you let yourself show
So now you'll love these screams
What's left of me
Don't speak
Love these screams
Like I do
My name
Don't ever speak my name
Don't ever speak my name again
Don't ever speak it

Don't ever speak my name again
Don't speak, don't speak
Don't ever my
Don't speak my name
So now you'll love these screams
What's left of me
Don't speak
Love these screams
Like I do
My name
