

# Stronger Than Dirt

## Epsilons

Somebody wake me up  
The dream is growing cold  
And the night is all we have  
Left to hold Somebody sail this ship  
    Navigate this crowd  
    For what I once saw as land  
I see as cloud But I am stronger than you  
    And I am braver than you  
    And I will still be here  
When the dust has cleared Sometimes nothing is  
    The better hand  
    And you throw it all for this  
I understand But I am stronger than you  
    And I am braver than you  
    And I will still be here  
When the dust has cleared will you  
Will you, will you, will you And I will still be here  
    When the dust has cleared  
    And I will still be here  
    When the dust has cleared  
Will you You will never get close to me  
    You will never get close to me  
    This is who we are  
This is who we are You will never get close to me  
    Who we are...  
    You will never get close to me  
    Who we are...
