

# Saboteurs (Lyrics English & Deutsch)

## Sabaton

Dropped down to a world of ice  
A plateau of frozen lakes  
A Nazi place of doom in their sights  
Training camps on Scottish Heights  
To commando saboteurs  
A mission of their lives lies ahead  
Called in to serve  
And they knew what to do  
They were the heroes of the cold  
Warrior soul, they signed a book of history  
They played a leading role to win the 2nd war  
Allied time was running short  
They would race against the bomb  
And hours turned to days, time passed on  
As the nature Test their strength  
They would fight through night and day  
To live amongst the wild, stay alive  
Called in to serve  
And they knew what to do  
They were the heroes of the cold  
Warrior soul, they signed a book of history  
They played a leading role to win the 2nd war  
Heroes of the Telemark  
Carry viking blood in veins  
Warriors of the northern land  
They live forever more  
They live forever more  
Called in to serve  
And they knew what to do  
They were the heroes of the cold  
Warrior soul! Warrior soul, they signed a book of history  
They played a leading role to win the 2nd war  
They played a leading role to win the 2nd war
