Those Days You Felt Alive

Spitalfield

And I'll go, take a walk inside your head
So that I can see your thoughts
I'll try not to hold back
But I'm thinking when you smileFor your blue skies
For those times you felt alive
Breathing and softly releasing
I won't let you goI think I know what you won't tell me
I've got this figured out and then you
Go and change it
You go and change itI think I know what you won't tell me
I've got this figured out and then you
Go and change it
You go and change it
Go and change it
You go and change itYou know
You've got me in your hands
I'll break before I walk
Tonight we broke our plansTo play games with our hearts
For your blue skies
For those times you felt alive
Breathing and softly releasing
I won't let you goI think I know what you won't tell me
I've got this figured out and then you
Go and change it
You go and change itI think I know what you won't tell me
I've got this figured out and then you
Go and change it
You go and change it
Go and change it
You go and change itI think I know what you won't tell me
I've got this figured out and then you
Think I know what you won't tell meI think I know what you won't tell me
I've got this figured out and then you
Go and change it
You go and change itI think I know what you won't tell me
I've got this figured out and then you
Go and change it
You go and change it
