

Young Love

Noel Gourdin

I reminisce over you my dear
It's the ending of our first year, as time passes by
And though the future is unclear
I can promise you this, my love will never die

So when the world is against us
And all the pressure, it builds up
Until the point where I feel I should give up
That's when I look in the distance
And see just what I'd be missing
So let the people keep on talkin', cause there is no breakin' up

Cause I don't want to grow up
Baby girl if this is young love, young love
I just want to be with you wherever you are, oh baby
Cause I don't want to grow up
Baby girl if this is young love, young love
I just want to be with you wherever you are

Now we could settle down and have a few kids
Never gets old, feels like the first kiss
When your lips touch mine
Seasons may change but your heart's still true
You're the home that I could run to
And I will keep on running baby, running right back to you

So when the world is against us
And all the pressure, it builds up
Until the point where I feel I should give up
That's when I look in the distance
And see just what I'd be missing
So let the people keep on talkin'
Cause there is no breakin' up

Cause I don't want to grow up
Baby girl if this is young love, young love
I just want to be with you wherever you are
Cause I don't want to grow up
Baby girl if this is young love, young love

I just want to be with you wherever you are

To school days on the play ground
To long talks on the phone till we figured it out
I got my first whiff, I was acting up
Back seat love for making up
I've gotta let you know you're the greatest
Keep our love strong to the days in and there is no way I am givin' up

Cause I don't want to grow up
Baby girl if this is young love, young love
I don't want to grow old without
Cause I don't want to grow up
Baby girl if this is young love, young love
Cause I just want to be with you, you with me
Let's settle down, have a family
