

Borrelia Mass

Bleed The Sky

Down Taking the first step
Has left you all dried up
The demon has slipped
And forced you under the gun I can't see the future
No one can stop this
Nature's test is second best
Give a chance to sorrow Never faulting, never feeling
It's already become this way
Never seeming that you're feeling
It's already become this fake Into the grave, you're my demotivation
Take me to the place where I should fall
That's where you want to see it all
Send me home you know I need it all
That's where you watch it all Never faulting, never feeling
It's already become this way
Never seeming that you're feeling
It's already become this fake Take my life, I hand it over
You will use it for your gain
Never seeming that you're feeling
It's already become this fake You fuck, what a failure
To us all, to us all you've failed
Your vice, your lies, your temptation is gone
It's your time to fall You're my demotivation
Take me to the place where I should fall
That's where you want to see it all
Send me home you know I need it all
That's where you watch it all First in line to taste the wine before the finish
Gets demotivation
Last in line to beat the blind, enjoy the finish
Gets demotivation, demotivation Down
Down
Down
