

Take a Chance (feat. Wale)

Monica

(Wale)

Just a couple of things

This as honest as I can be My sole objective is to love listen and respect her

And for this very second I'm just sayin' that you special enough for me to want to protect you against you

Don't love me shawty (Monica)

Im sure you did a lot of things before I got in the picture didn't ya?

Wait, don't tell me

I know you kissed a lot of girls, told a lot of lies and broke a few hearts

But listen

I aint feel none of that last night when you held me

I just wanna believe that you met a girl and felt something different

(Different from all the other ones)

And I believe that girl met you and saw someone who had some beautiful intentions So let's just take a chance,

take a hand, take a leap

And do what most won't understand

Let's just take a chance, who knows where we'll land

I'll be down if you tell me you can

I'm willing to change my plans

I'm willing to take that chance

(Let's take a chance) (Wale)

Uh, settle down queen

No one bet on you forever, this for now queen

When the time's right, get ya mind right

We gone tell the whole town this is our thing

But for now queen this is how I be

I could fully understand if you gotta leave

When the time's right, get my mind right

I'ma get these bummy b****s from around me

Got a past I'm ashamed of, past full of danger

I can give you e'rything but a last name is sacred

All I ask is this chance that you take

And be safe with yourself and never lack any patience

I'm a young wild dude who been through a lot

Using p***y and groupy b****s to conceal my heart

It could stop, I take 'em down but I take you out

It's funny how you got the ring and they only give up the box So let's just take a chance, take a hand, take a leap

And do what most won't understand

Let's just take a chance, who knows where we'll land

I'll be down if you tell me you can

I'm willing to change my plans I won't pay attention to the obvious, no
(Cause I found love)
So there's no need for you to mention your past
I'm ready So let's just take a chance, take a hand, take a leap
And do what most won't understand
Let's just take a chance, who knows where we'll land
I'll be down if you tell me you can
I'm willing to change my plans
I'm willing to take that chance
(Let's take a chance)
