

# As You Wish

## Brandtson

In a box under my bed  
I've kept them  
Safe from all the world  
And every one  
Wished upon in some way  
But that never works out  
Burning bright then burning out  
Disappear and then fall down  
Are they special or just broken  
Dying or moving on?  
Am I always wrong?  
Can you see it?  
There's another one right there  
And it's falling  
'Cause it's finished  
Being a star  
Can you feel it?  
Does it mean as much to you?  
Honestly (x3)  
Am I that wrong?  
Is it me every time?  
Show me how to take this  
As you go on and on
