

# Eyes Like Snow

## Full Service

You float in a heavenly glow  
Eyes like snow and your ice dress flows  
Is this the north pole, are we close  
Frost bite's bitten my nose, it's frozen so  
My love you know I'll follow you close  
Follow you over the globe, we'll find it This time you've lost me I think  
This time you're causing me pain  
This time I've lost you, my friend  
This time's the end This darkness hides an ocean of hope  
Layers unknown in the cold far below  
Your spirit lies asleep but it glows  
Keep looking inward you know how this can go  
My love you know I'll follow you close  
Follow you over the globe, we'll find it Once upon a moonlit farm  
Blue elves with strings  
On their arms  
Sheets of frozen wind  
Carry pine, mint  
Penguins spin and spun  
There's fire-wood  
There's merry song  
Off in the distance  
Light shines from within
