Bleeding

Flickerstick

See you down on your knees
but I know your beggin' please
Why you still here
So mean to me
So you, you, want to know
but you'll never be with me
How far will you drive
How far will you drive
Tonight I'm gonna be
another catastrophe
better than the first time
So why, why, why'd you go
Your tearing me down so low
I knew you'd be here tonight
How far will you drive
How far will you drive
How far will you drive
Everyone is here with me
but there just here to be seen
Maybe I could, watch them bleed
if they werent so fuckin' mean
How far will you drive
How far will you drive
How far will you drive

So why, why, why'd you go
Your tearing me down so low
I always knew you'd be here tonight
Can't we get it right
And for once try not to fight
and I could still be bleeding, bleeding, bleeding, bleeding, bleeding
Watch me get it right
How far will you drive
How far will you drive
How far
How far will you drive
You say it's over
You say it's over
And I think you believe yourself, when you say

You say it's over
You say it's over
And I think you believe yourself, when you say
When you say
When you say
When you say
When you say
