

# Is There Something?

## The Elwins

Do you wonder  
Do you wonder at all  
If a step is just a stop from a fall  
Drop the ball  
And have your top turn gray, my dear  
We're barely here Take a dive  
Slowly in the shallow end  
You compromise  
Show colours that do not offend Is there something that's under your skin  
Makin you a cradle and you wanna settle in  
Your hope is that you'll give it a try  
But I don't think you think you've got it inside  
Is there something?  
Something, something Running over the lines across your face  
Feeling the cut of a rut that's in its place  
Start to stray and fell it pull away, my dear  
We're barely here Take a dive  
Slowly in the shallow end  
You compromise  
Show colours that do not offend Is there something that's under your skin  
Makin you a cradle and you wanna settle in  
Your hope is that you'll give it a try  
But I don't think you think you've got it inside  
Is there something that I could have said  
I know there's an answer that is hiding in your head  
Is there something?  
Something, something I know you'll make it out someday  
You know I'm here for you  
We'll get together in some way  
I know you feel it too And again (x16) Is there something that's under your skin  
Makin you a cradle and you wanna settle in  
Your hope is that you'll give it a try  
But I don't think you think you've got it inside  
Is there something that I could have said  
I know there's an answer that is hiding in your head  
Your hope is that you'll give it a try  
But I don't think you think you've got it inside  
Is there something?  
Something, something
