

Give Me Order

Two People

[Verse 1]

Keep your scar tucked away

I keep mine in the way

Keep your scar tucked away

I keep mine in the way

I don't know why

My guess is that it's cooler

There, than out here

Than out here

[Chorus]

Give me order

Give me order

I need your order

I need your order

Give me order

Give me order

I need your order

I need your order[Verse 2]

My sister told me not to worry

Don't be lonely, just be happy

That was the only place I could see

Your city learned on me

[Chorus]

Give me order

Give me order

I need your order

I need your order

Give me order

Give me order

I need your order

I need your order
