Inner Combustion

Voivod

Crucible heats up

Arsening, mercury

And acid concoct

Hermetic theory

Hydrogen vapours

Exclusion principle

It's never over

For ever practicalAnd I try

Throughout time

Any rite

For the signLight rebounds

Pure neon

I surround

All am I, I am all

Fluorescent light

Pellucid mineral

Essential dogma

Excludes the logical

Immobile centre

One, two, three for nothing

Projection ponder

Under a raven's wing

Catalyst fusion

Inner combustion

A transmutation

For I am all
