

Natural Thing

[John Fogerty](#)

Well, the flower was made for beauty
And the bee was made to sting
All around this world
Honey, it's a natural thing It can shake the high and mighty
Bring a strong man to his knees
All around this world
Honey, it's a natural thing And a man gets up in the mornin'
He got to find that tiger to tame
All around this world
You know it's a natural thing But a man alone ain't nothin'
Every Tarzan needs a Jane
All around this world
Honey, it's a natural thing Well, we got it Well, the little girls lookin' so pretty
They make a poor man feel like a king
All around this world
Honey, it's a natural thing It drive a man to cross the desert
Or risk his life on a stormy sea
All around this world
Yeah, it's a natural thing Oh yeah Well, the flower was made for beauty
And the bee was made to sting
All around this world
Honey, it's a natural thing All around this world
Honey, it's a natural thing Who, what to do me, what, yeah
