She

Stealing Sheep

She, she has gone
Now she's running, now she's running after everyone
She has gone
I feel it in the airI know, it's all the same
Standing, out in the rain
I know, it's all the same
Standing, out in the rainScale over mountains
Tin foil dreams
Litter in the sand
Jewels in your hand
Those rituals and tale and trails
A constant cycle
There's no use in hiding from the sunShe, she has gone
She's running after everyone
She has gone
I feel it in the airScale over mountains
Tin foil dreams
Litter in the sand
Jewels in your hand
Those rituals and tale and trails
A constant cycle
There's no use in hiding from the sunShe, she has gone
She's running after everyone
She has gone
I feel it in the air (feel it in the air x3)Are we starting to think that there's nothing there
Starting to think that this is nowhere
Its started taking over youAre we starting to think that there's nothing there
Starting to think that this is nowhere
Its started taking over youAre we starting to think that there's nothing there
Starting to think that this is nowhere
Its started taking over youAre we starting to think that there's nothing there
Starting to think that this is nowhere
It's started taking over youI know, it's all the same
Standing, out in the rain
I know, it's all the same
Standing, out in the rain
