Afterlife

Gamma Ray

Do you believe in the afterworld or the afterlife?
Do you agree there's a place for us beyond our life?
Where the timeless call for life is lost and you will see
The forgotten dreams that you once had become realityThey will be set free another day
You cannot leave if you do not want to stay
In the afterlife, in the afterlifeLife's a dream that you will forget in the endless space
And the scars you got on planet earth will be erased
You were blind until your eyes have stopped to see
And your powers unfold by the moment you hit eternityYou will be set free
But you'll never return that's the price you have to pay
In the afterlife, in the afterlifeNow you're gone without a word, you didn't say goodbye
I miss you here, where are you now, an angel in the sky?
Your visit here has been too short, you left to be set free
But I believe we'll meet again and together we will stayIn the afterlife, in the afterlife
In the afterlife, in the afterlife
In the afterlife
There's no return in the afterlife[Incomprehensible] in the afterlife, life, life
[Incomprehensible] we'll meet again
In the afterlife
Afterlife
