Hypersonic

Dilemn

Yeah, I got a ticket to ride
For two, I'm going up to the wild blue
I keep my surface ultra cool
And all my fuel can be renewed
While we wait around with delay
The sudden news is just fast-talking
Your skin is oily, your story's old
So tell it while your walking
I'm flying hypersonic
Flying with my hyper tonic
Yeah, I'll uproot you terrorist
I am the guide to the perplexed
Man take this tip, I'm gonna win
I'll put it all on hydrogen
'Cause our lives have gotten tied
To people we should untangle
It's all out of fatal cost
To keep us over barrels
I'm flying hypersonic
Flying with my hyper tonic
You thought that we were fast before
But we're going faster and faster and faster and faster
We got time we're doing fine
Mach 8 acceleration
The sky is clear don't interfere
With aspirations of this nation
I'll shoot new cities in the space
Drag you at the new space races
Fast as dead line can flow
And look around, we leave no traces
I'm flying hypersonic
We're lying with my hyper tonic
Flying hypersonic
We're flying with my hyper tonic, oh yeah
Flying hypersonic
We're flying with my hyper tonic, oh
