# It's a Fact

## Anarbor

Give me a dry desert heat
Brings out the animal in me
I like the way you move across the room
And on your way to meIll take whiskey on the rocks
Dont mean much more than i got
But the minute I saw you
I said I have to have that tooRed lights from above
Red lights spell I love
The truth rhythm into remedy
Is all I needSelling out body never made sense to me
Its a fact that im like that
Help you out break the law just to make a little money
Its a fact that im like thatAnd nightlife aint no good life but its my life
And were never stopping
The words dont buy you can always come to me
Its a fact that im like thatWhen the sun goes back to sleep
I wake to reality
And that says kid if I follow you?
Will you follow me?Red lights from above
Red lights spell I love
Cause you, me in the naked heat
Is all I needSelling out body never made sense to me
Its a fact that im like that
Help you out break the law just to make a little money
Its a fact that im like thatAnd nightlife aint no good life but its my life
And were never stopping
The words dont buy you can always come to me
Its a fact that im like thatAlways be yourself
Always give them hellSelling out body never made sense to me
Its a fact
Help you out break the law just to make a little money
yeahAnd nightlife aint no good life but its my life
And were never stopping
The words dont buy you can always come to me
Its a fact that im like that
