

Vessel (Hassan Abou Alam Remix)

Nine Inch Nails

I let you put it in my mouth
I let it get under my skin
I let you pump it through my veins
I let you take me from within
They tell us what we can and cannot do
Same thing we've heard a hundred times before
The way I put you inside of me
None of that matters anymore
My god, can we go any faster?
Oh my god, I don't think I can last here
My god, can we go any faster?
Oh my god, I don't think I can last here
I am you, and you are me
You will never be alone
But I have finally found my place in everything
I have finally found my home
I can leave all the best behind
I can see right through the whole facade
I am becoming something else
I am turning into god
My god, can we go any faster?
Oh my god, I don't think I can last here
My god, can we go any faster?
Oh my god, I don't think I can last here
(I don't think I can)
My god, can we go any faster?
Oh my god, I don't think I can last here
My god, can we go any faster?
Oh my god, I don't think I can last here
