

Throw a Penny

Bee Gees

Little child, I have found
If I stood up and looked around
I'd see a brand new face staring right back at me
I believe, I am sure
That I'm taller then I was before
Building a brand new bridge into sincerity But it's the times like this we must learn to grow
Throw a penny for my children, they are going down
When the light shines down much brighter, many souls are found
And I can't believe what they're saying in the overground
Throw a penny for my children going down Listen to the wise man as he breathes
He's really loving me
Loving me
He must be loving me
Loving me At night I turn my face into the wind
And I whisper secretly
Secretly
What means the most to me
And bring him close Make it bad, make it good
Make it easy to be understood
Well, I see a velvet day breaking across the sky
I believe, I am sure
I am taller then I was before
Building a brand new bridge, I know I'm gonna try But it's the times like this we must find out why
Throw a penny for my children, they are going down
When the light shines down much brighter, many souls are found
And I can't believe what they're saying in the overground
Throw a penny for my children going down Throw a penny for my children, for my children going down
Throw a penny for my children, for my children going down
Throw a penny for my children, for my children going down
Throw a penny for my children, for my children going down
Throw a penny for my children, for my children going down
