

# Disappear

Cavo

Can you tell me where to go, its killing me and no one knows,  
Inside with all this mind, we waste the sunlight waiting for the night  
They dont wanna break me down; they dont wanna break away from you  
Everythings wrong now, everyones gone now,  
I cant keep lying to myself  
Cuz everythings clear now they disappear now  
Cuz they dont wanna stay with you Can you tell me where to go its killing me and no one knows,  
Inside with all this mind, you waste the sunlight waiting for the night  
They dont wanna break me down; they dont wanna break away from you  
Everythings wrong now, everyones gone now,  
I cant keep lying to myself  
Cuz everythings clear now, they disappear now  
Cuz they dont wanna stay, I shouldnt be waiting for this life  
Maybe another dream wont die  
They cant be the first and be the last to break away They dont wanna break me down; they dont wanna break  
away from you  
Everythings wrong now, everyones gone now,  
I cant keep lying to myself  
Cuz everythings clear now they disappear now  
Cuz they dont want to stay with you
