

Watching Me From Afar

[Anette Olzon](#)

Like every wind that blows
And stars that glow
Deep in the darkest night
You're my light
From all the flowing trees
To little bees
Beneath what's wrong or right
You're the air I breathe
Just like a melody
floating over time and space
I see your face
No matter where you are
no matter how near or far
you're in my heart
like a star
watching me from afar
Deep in the darkest time
your shine on mine
show me the way to climb
do what's right
For every single word
You're in my world
The doubts just disappear
you're the one I hear
Just like a melody
floating over time and space
I see your face
No matter where you are
no matter how near or far
you're in my heart
like a star
watching me from a far
