Voodoo

Oh Land

You changed your silhouette
You cast another shadow
You're speaking like scissors
Cutting out a foreign pattern
All the things you do
Affecting my behavior
No doctors got me diagnosed
No science proves a safe cure
It's voodoo you do
There's needles everywhere
It's voodoo you do
There is fire in the air
All the noise will disappear
It's voodoo you do
There's needles everywhere
It's voodoo you do
I go higher in the air
I'm possessed when you are near
I love the color red
It is for love, it is for death
It is my ritual
I see it as my duty
Seduction is an art
You can see through all the beauty
I know you wonder why
I'm so afraid of learning
If I give in to you
There is no returning
It's voodoo you do
There's needles everywhere
It's voodoo you do
There is fire in the air
All the noise will disappear

It's voodoo you do
There's needles everywhere
It's voodoo you do
I go higher in the air
I'm possessed when you are near

Ooh, electrodes
Disturbing the activity
In my brain
Just a few more diodes connected
And the smiles are coming back
Again, again, again
Ooh, electrodes connecting
And tuning you in
I love the color red
It is for love, it is for
Voodoo, there's needles everywhere
It's voodoo you do
There is fire in the air
All the noise will disappear
It's voodoo you do
There's needles everywhere
It's voodoo you do
I go higher in the air
I'm possessed when you get near
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
There's needles everywhere
