Voodoo

Oh Land

You changed your silhouette You cast another shadow You're speaking like scissors Cutting out a foreign pattern All the things you do Affecting my behavior No doctors got me diagnosed No science proves a safe cure It's voodoo you do There's needles everywhere It's voodoo you do There is fire in the air All the noise will disappear It's voodoo you do There's needles everywhere It's voodoo you do I go higher in the air I'm possessed when you are near I love the color red It is for love, it is for death It is my ritual I see it as my duty Seduction is an art You can see through all the beauty I know you wonder why I'm so afraid of learning If I give in to you There is no returning It's voodoo you do There's needles everywhere It's voodoo you do There is fire in the air All the noise will disappear

It's voodoo you do
There's needles everywhere
It's voodoo you do
I go higher in the air
I'm possessed when you are near

Ooh, electrodes Disturbing the activity In my brain Just a few more diodes connected And the smiles are coming back Again, again, again Ooh, electrodes connecting And tuning you in I love the color red It is for love, it is for Voodoo, there's needles everywhere It's voodoo you do There is fire in the air All the noise will disappear It's voodoo you do There's needles everywhere It's voodoo you do I go higher in the air I'm possessed when you get near There's needles everywhere There's needles everywhere
