

Tell The World

Olly Murs

I can see pouring rain
See my future heading for the drain
So bet'cha wondering
Why I got a grin permanently on my face
Stumbling downhill fast
Wasting time that I just don't have
But still I got a smirk
Like I'm up in first
When I'm in economy class
And I could be on my knees
Going from bad to worse
And all my hopes and dreams
Come crashing down to earth
No matter how bad it seems...Any time I wake up and I see your face
Every single morning it's a sunny day
Don't know how I ever lived life without you
But girl you got me running to the highest place
So they can hear me screaming from miles away
Gotta tell the world how I feel about you
Tell the World
This ladder I'm 'bout to climb
Need the highest roof that I can find
I'm heading for the top
Dodging all the rocks
Till I hit the clear blue sky
Every day I keep it to myself
I'm doing damage to my mental health
If I don't let go think I might explode
If I don't get help
I could be on my knees
Going from bad to worse
And all my hopes and dreams
Come crashing down to earth
No matter how it seems...Any time I wake up and I see your face
Every single morning it's a sunny day
Don't know how I ever lived life without you
But girl you got me running to the highest place
So they can hear me screaming from miles away
Gotta tell the world how I feel about you
Tell the World
What a wonderful feeling
She got me up so high feel like I'm touching the ceiling
I can touch the sky me and the birds are chilling
Yeah you got that lottery love - one in a million
One of a kind, many men spend their whole lifetime

Searching just for the special someone but it aint my girl
So I don't care if they look at me weird
I know just what I got and I'ma tell the world Any time I wake up and I see your face
Every single morning it's a sunny day
Don't know how I ever lived life without you
But girl you got me running to the highest place
So they can hear me screaming from miles away
Gotta tell the world how I feel about you
Tell the World
