

Laugh It Off

Dorothy Moore

Give me what you can
I'm a girl who depends on just a little love
To help me make it through the cold and weary nights
Just enough to take away the tough part of living
Cant you see I'm willing toCHOLaugh it off try laughing it all off
Making fun where none had been before
Laugh it off try laughing it all off
Brighten up my corner laughing off the things that have torn apart my dreams so longBeen brought down way
too long
and i know there's no wrong worse than blaming yourself
When the dreams you were building start to fall
All around you pace around
you feel you've been taken
your whole world is shaking , Justrept. choBridgegive yourself a chance to see the kind of girl I want to berept.
cho.
