

# It's Scary

## Slam Donahue

When you get back we can run away  
rent an apartment with studio space  
invited by the world to meet face to face  
finally catch the things that we've chased

and just like every other kid we wanted you to understand

well the thought caught and landed on a breeze  
picked up our bags and sailed over seas  
up above the world all we could see  
a couple of buildings but mostly just trees

it's scary to bury your fears

well rehearsed in all of our roles  
no time to think of what we were told  
out into the world stay we can't stay  
says you're either acting or watching the play

we have to stay and we have to go  
and all the little people they want to understand

---
