Smfu (save Me From U)

Dawn Richard

[Verse 1]It's a mistery how no-ones figured you out
When it gets to deep you just let me drown yeah
Who needs an enemy when the one you love is tearing you down ohh
And dragging you into the ground
[Pre-Chorus]I'm tired of waiting
I'm tired of calling
Only for you to let me down
My heart is aching
No more tears falling
From here on now I made a vow
[Chorus](I don't need no)
I don't need no rescue from a fallen plane
Save me from a building going up in flames
So baby before you go put on your game
Save me from you
Don't know the man behind no mask identity
Cause your the only hero I know that can be
Saving everyone but keep on hurting me
Save me from you
[Verse 2]My hearts on my sleeve everytime you come around ohh
When you have the key, you chose to shut me out
How can you be the superman with an S on your chest
When everytime i need you first i seem to always be last
No more signals in the sky, so your no-where to be found

[Chorus](I don't need no)
I don't need no rescue from a fallen plane
Save me from a building going up in flames
So baby before you go put on your game
Save me from you
Don't know the man behind no mask identity
Cause your the only hero I know that can be
Saving everyone but keep on hurting me
Save me from you
[Bridge]I don't need your protection from danger
I don't need you to sheild me from harm
I don't you to save me from a robbery,
When your the one who's stolen my heart
Don't need to steer my ship from a glacier,

When your the one breaking us apart
I don't need you to come save the day, just save me from your arms
[Chorus]I don't need no rescue from a fallen plane
Save me from a building going up in flames
So baby before you go put on your game
Save me from you (I need you to save)
Don't know the man behind no mask identity (I need you to save)
Cause your the only hero I know that can be
Saving everyone but keep on hurting me
Save me from you
It's a mistery how no-ones figured you out
