

# Day of the Triffids

[Ash](#)

In the midday heat I gave a sigh  
Cruisin' through the garden district I was out of mind  
The star of India's in my hotel room  
In a brief combination 3,2,1, (which only I know)  
And I've just seen by mentor Dr No  
California sun is on the radio let's go I just want to reach the radio star  
I just want to reach the radio star  
It's a satellite of Venus and it ain't to far  
I just want to reach the radio star I was shooting up in my hotel room  
When my phone started ringing oh no  
It was Dr No he gave me the password  
He said hey man haven't you heard (I said no)  
The worlds been invaded by alien life forms  
Meet me at the airport, we've got to get out, let's go I just want to reach the radio star  
I just want to reach the radio star  
It's a satellite of Venus and it ain't to far  
I just want to reach the radio star
